Theravada Buddhism has experienced a powerful and far-reaching revival in modern Nepal, especially among the Newar Buddhist laity, many of whom are reorganizing their lives according to its precepts, practices and ideals. This book documents these far-reaching social and personal transformations and links them to political, economic and cultural shifts associated with late modernity, and especially neoliberal globalization. Nepal has changed radically over the last century, particularly since the introduction of liberal democracy and an open-market economy in 1990. The rise of lay vipassana meditation has also dramatically impacted the Buddhist landscape. Drawing on recently revived understandings of ethics as embodied practices of self-formation, the author argues that the Theravada turn is best understood as an ethical movement that offers practitioners ways of engaging, and models for living in, a rapidly changing world. The book takes readers into the Buddhist reform from the perspectives of its diverse practitioners, detailing devotees' ritual and meditative practices, their often conflicted relations to Vajrayana Buddhism and Newar civil society, their struggles over identity in a formerly Hindu nation-state, and the political, cultural, institutional and moral reorientations that becoming a "pure Buddhist"—as Theravada devotees understand themselves—entails. Based on more than 20 years of anthropological fieldwork, this book is an important contribution to scholarly debates over modern Buddhism, ethical practices, and the anthropology of religion. It is of interest to students and scholars of Asian Religion, Anthropology, Buddhism and Philosophy. Caraka, The Master Physician, Is Believed To Have Lived In The First Century Ad. The Samhita Composed By Him Forms The Bedrock Of Ayurvedic Practice Today. His Contribution To India S Cultural Inheritance Was Profound. Caraka Samhita Was, In Fact, A Revision Of An Older Text Agnivesa Tantra, Which Was Written Several Centuries Before Caraka S Time. Caraka S Revision Became So Popular That It Was Translated Into Tibetan, Arabic, English And Many Indian Languages. The Legacy Of Caraka Retells The Samhita In A New Format. Instead Of Adhering To The Sequence Of The Stha Nas In The Original, The Author Has Retold The Samhita Through Thematically Structured Chapters, In Contemporary Idiom. The Retelling Has Involved Some Degree Of Restructuring And Condensation But Has Ensured That Whatever Is Stated Can Be Traced Back To The Original. In A Detailed Introduction, The Author Has Commented On Specific Aspects Of Caraka S Philosophy, Concepts And Practice, As Seen From The Point Of View Of Modern Medicine. This Book Will Be Of Special Interest To Students Of A Yurveda, Medicine And Other Sciences, And Those Interested In The History Of Science In India. How did early Buddhists actually encounter the seminal texts of their religion? What were the attitudes held by monks and laypeople toward the written and oral

Pali traditions? In this pioneering work, Daniel Veidlinger explores these questions in the context of the northern Thai kingdom of Lan Na. Drawing on a vast array of sources, including indigenous chronicles, reports by foreign visitors, inscriptions, and palm-leaf manuscripts, he traces the role of written Buddhist texts in the predominantly oral milieu of northern Thailand from the fifteenth to the nineteenth centuries. Veidlinger examines how the written word was assimilated into existing Buddhist and monastic practice in the region, considering the use of manuscripts for textual study and recitation as well as the place of writing in the cultic and ritual life of the faithful. He shows how manuscripts fit into the economy, describes how they were made and stored, and highlights the understudied issue of the "cult of the book" in Theravāda Buddhism. Looking at the wider Theravāda world, Veidlinger argues that manuscripts in Burma and Sri Lanka played a more central role in the preservation and dissemination of Buddhist texts. By offering a detailed examination of the motivations driving those who sponsored manuscript production, this study draws attention to the vital role played by forest-dwelling monastic orders introduced from Sri Lanka in the development of Lan Na's written Pali heritage. It also considers the rivalry between those monks who wished to preserve the older oral tradition and monks, rulers, and laypeople who supported the expansion of the new medium of writing. This work offers a reconstruction of the politics of ancient Israel within the wider political environment of the ancient Near East. Gottwald begins by questioning the view of some biblical scholars that the primary factor influencing Israel's political evolution was its religion. Experts in CCD astronomy from North America and Europe have contributed to this book, illustrating their help and advice with many beautiful colour images – the book is in full color throughout. Techniques range from using simple webcams to highly technical aspects such as supernovae patrolling. Computer processing, stacking and image-enhancement are detailed, along with many hints and tips from the experts. The Seventh Platonic Letter describes Plato's attempts to turn the ruler of Sicily, Dionysius II, into a philosopher ruler along the lines of the Republic. It explains why Plato turned from politics to philosophy in his youth and how he then tried to apply his ideas to actual politics later on. It also sets out his views about language, writing and philosophy. As such, it represents a potentially crucial source of information about Plato, who tells us almost nothing about himself in his dialogues. But is it genuine? Scholars have debated the issue for centuries, although recent opinion has moved in its favour. The origin of this book was a seminar given in Oxford in 2001 by Myles Burnyeat and Michael Frede, two of the most eminent scholars of ancient philosophy in recent decades. Michael Frede begins by casting doubt on the Letter by looking at it from the general perspective of letter writing in antiquity, when it was quite normal to fabricate letters by famous figures from the past. Both then attack the authenticity of the letter head-on by showing how its philosophical content conflicts with what we find in the Platonic dialogues. They also reflect on the question of why the Letter was written, whether as an attempt to exculpate Plato from the charge of meddling in politics (Frede), or as an attempt to portray, through literary means, the ways in which human weakness and emotions can lead to disasters in political life (Burnyeat). Now with an Historical Afterword by Ron Miller Featured in Ron Miller's *The Conquest of Space Book Series*. *Pioneers of Space* (1949) was later reincarnated almost word-for-word as the "non-fiction" *Inside the Space Ships*, one of the books largely responsible for the UFO craze of the 1950s and 60s. Ghost-written by Adamski acolyte Lucy McGinnis, this novel contains some of the most inept scientific ideas imaginable. In the early 1950s, "Professor" George Adamski laid the groundwork for all subsequent UFO contactees. In *Pioneers of Space* he created many of the incidents and qualities he later attributed to the "actual" inhabitants of Venus, Mars and Saturn he later claimed to have met. In addition, we get a look at some of the strange "science" this self-proclaimed astronomer believed in. "Facts" such as there must be oxygen in space otherwise the sun could not burn... This book offers a new interpretation of the relationship between 'insight practice' (satipatthana) and the attainment of the four jhānas (i.e., right samādhi), a key problem in the study of Buddhist meditation. The author challenges the traditional Buddhist understanding of the four jhānas as

states of absorption, and shows how these states are the actualization and embodiment of insight (vipassanà). It proposes that the four jhànas and what we call 'vipassanà' are integral dimensions of a single process that leads to awakening. Current literature on the phenomenology of the four jhànas and their relationship with the 'practice of insight' has mostly repeated traditional Theravàda interpretations. No one to date has offered a comprehensive analysis of the fourfold jhàna model independently from traditional interpretations. This book offers such an analysis. It presents a model which speaks in the Nikàyas' distinct voice. It demonstrates that the distinction between the 'practice of serenity' (samatha-bhàvanà) and the 'practice of insight' (vipassanà-bhàvanà) – a fundamental distinction in Buddhist meditation theory – is not applicable to early Buddhist understanding of the meditative path. It seeks to show that the common interpretation of the jhànas as 'altered states of consciousness', absorptions that do not reveal anything about the nature of phenomena, is incompatible with the teachings of the Pàli Nikàyas. By carefully analyzing the descriptions of the four jhànas in the early Buddhist texts in Pàli, their contexts, associations and meanings within the conceptual framework of early Buddhism, the relationship between this central element in the Buddhist path and 'insight meditation' becomes revealed in all its power. Early Buddhist Meditation will be of interest to scholars of Buddhist studies, Asian philosophies and religions, as well as Buddhist practitioners with a serious interest in the process of insight meditation.

Cartoonist Osamu Tezuka (1928?1989) is the single most important figure in Japanese post-World War II comics. During his four-decade career, Tezuka published more than 150,000 pages of comics, produced animation films, wrote essays and short fiction, and earned a Ph.D. in medicine. Along with creating the character Astro Boy (Mighty Atom in Japan), he is best known for establishing story comics as the mainstream genre in the Japanese comic book industry, creating narratives with cinematic flow and complex characters. This style influenced all subsequent Japanese output. *God of Comics* chronicles Tezuka's life and works, placing his creations both in the cultural climate and in the history of Japanese comics. The book emphasizes Tezuka's use of intertextuality. His works are filled with quotations from other texts and cultural products, such as film, theater, opera, and literature. Often, these quoted texts and images bring with them a world of meanings, enriching the narrative. Tezuka also used stock characters and recurrent visual jokes as a way of creating a coherent world that encompasses all of his works. *God of Comics* includes close analysis of Tezuka's lesser-known works, many of which have never been translated into English. It offers one of the first in-depth studies of Tezuka's oeuvre to be published in English. Any amateur astronomer who is interested in astrophotography, particularly if just getting started, needs to know what objects are best for imaging in each month of the year. These are not necessarily the same objects that are the most spectacular or intriguing visually. The camera reveals different things and has different requirements. What objects in the sky tonight are large enough, bright enough, and high enough to be photographed? This book reveals, for each month of the year, the choicest celestial treasures within the reach of a commercial CCD camera. Helpful hints and advice on framing, exposures, and filters are included. Each deep sky object is explained in beautiful detail, so that observers will gain a richer understanding of these astronomical objects. This is not a book that dwells on the technology of CCD, Webcam, wet, or other types of astrophotography. Neither is it a book about in-depth computer processing of the images (although this topic is included). Detailed discussions of these topics can be found in other publications. This book focuses on what northern latitude objects to image at any given time of the year to get the most spectacular results. This ambitious cross-disciplinary study of Buddhist modernism in colonial Cambodia breaks new ground in understanding the history and development of religion and colonialism in Southeast Asia. Questions of methodology and the use of sources are fundamental to all academic disciplines. In recent years, this topic has become far more challenging as scholars are increasingly adopting an interdisciplinary approach to achieve richer and deeper analyses, particularly in the humanities and social sciences. *Building New Bridges / Bâtir de nouveaux ponts* is a collection of scholarly papers that deals with the first principles of source identification and their effective utilization. The contributors to the volume come from a wide range of disciplines and represent both French and English Canada. Together, they explore and encourage the interdisciplinarity trend - around which considerable academic trepidation remains - and seek to explain, for example, how historians and those in English or *Lettres françaises* analyze texts, how scholars

approach paintings, photography, and film, and how the study of music relates tempo and lyrics to wider societal trends. They utilize their respective research to elucidate means of effectively employing evidences and methods to achieve richer, deeper, and more nuanced results. As a whole, the collection provides an excellent primer for scholars of methodology. This title offers context for the reams of declassified UFO-related documents that have been released in the United States, Brazil, and other countries; explores secret government programs that were revealed in recent years and before; and compiles and explains the UFO phenomena in all its aspects. Over the course of the nineteenth century, most of the Theravada world of Southeast Asia came under the colonial domination of European powers. While this has long been seen as a central event in the development of modern forms of Theravada Buddhism, most discussions have focused on specific Buddhist communities or nations, and particularly their resistance to colonialism. The chapters in this book examine the many different colonial contexts and regimes that Theravada Buddhists experienced, not just those of European powers such as the British, French, but also the internal colonialism of China and Thailand. They show that while many Buddhists resisted colonialism, other Buddhists shared agendas with colonial powers, such as for the reform of the monastic community. They also show that in some places, such as Singapore and Malaysia, colonialism enabled the creation of Theravada Buddhist communities. The book demonstrates the importance of thinking about colonialism both locally and regionally. Providing a new understanding of the breadth of experiences of Theravada and colonialism across Asia., this book will be of interest to scholars in the field of Buddhist Studies, Asian History, Comparative World History, Southeast Asian Studies and Religious Studies. The increasing impact of performance based judgments on schools and teachers in the classroom has its critics and supporters. Some oppose the trend and seek to deny the importance of quantitative measures. Others have sought to find ways of implementing educational measurement constructively and with understanding of the concerns. Classrooms are where the operational business of learning takes place and it is on the quality of life within the classroom that the broader process of learning, concerns for the wider community and others, is nurtured. The climate of the classroom has a large impact on the final outcome measure to which so much interest is directed. To help our understanding of the dynamics involved much work has been done in the development and refinement of quantitative studies to this area by studying essential information about how teachers and students perceive the environments in which the work. Research on classroom climates has reached a practical and theoretical maturity and this volume offers an account of the developments that have taken place and the potential for understanding the classroom as a vital component of the curriculum. This book will also be an essential resource tool for anyone engaged in classroom research. In this ambitious and path-breaking book, Shawn McHale challenges long held views that define modern Vietnamese history in terms of anticolonial nationalism and revolution. McHale argues instead for a historiography that does not overstress either the role of politics in general or Communism in particular. Using a wide range of sources from Vietnam, France, and the United States, many of them previously unexploited, he shows how the use of printed matter soared between 1920 and 1945 and in the process transformed Vietnamese public life and shaped the modern Vietnamese consciousness. *Print and Power* begins with an overview of Vietnam's lively public spheres, bringing debates from Europe and the rest of Asia to Vietnamese studies with nuance and sophistication. It examines the impact of the French colonial state on Vietnamese society as well as Vietnamese and East Asian understandings of public discourse and public space. Popular taste, rather than revolutionary or national ideology, determined to a large extent what was published, with limited intervention by the French authorities. A vibrant but hierarchical public realm of debate existed in Vietnam under authoritarian colonial rule. The work goes on to contest the impact of Confucianism on premodern and modern Vietnam and, based on materials never before used, provides a radically new perspective on the rise of Vietnamese communism from 1929 to 1945. Novel interpretations of the Nghe Tinh soviets (1930-1931), the first major communist uprising in Vietnam, and Vietnamese communist successes in World War II built an audience for their views and made an extremely alien ideology comprehensible to growing numbers of Vietnamese. In what is by far the most thorough examination in English of modern Vietnamese Buddhism and its transformations, McHale argues that, contrary to received wisdom, Buddhism was not in decline during the 1920-1945 period; in

fact, more Buddhist texts were produced in Vietnam at that time than at any other in its history. This finding suggests that the heritage of the Vietnamese past played a crucial role in the late colonial period. *Print and Power* makes a significant contribution to Vietnamese and Asian studies and will be of compelling interest to those in the fields of comparative religion and European colonialism. Recent decades have seen a groundswell in the Buddhist world, a transnational agitation for better opportunities for Buddhist women. Many of the main players in the transnational nuns movement self-identify as feminists but other participants in this movement may not know or use the language of feminism. In fact, many ordained Buddhist women say they seek higher ordination so that they might be better Buddhist practitioners, not for the sake of gender equality. Eschewing the backward projection of secular liberal feminist categories, this book describes the basic features of the Buddhist discourse of the female body, held more or less in common across sectarian lines, and still pertinent to ordained Buddhist women today. The textual focus of the study is an early-first-millennium Sanskrit Buddhist work, "Descent into the Womb scripture" or *Garbhāvākṛānti-sūtra*. Drawing out the implications of this text, the author offers innovative arguments about the significance of childbirth and fertility in Buddhism, namely that birth is a master metaphor in Indian Buddhism; that Buddhist gender constructions are centrally shaped by Buddhist birth discourse; and that, by undermining the religious importance of female fertility, the Buddhist construction of an inauspicious, chronically impure, and disgusting femininity constituted a portal to a new, liberated, feminine life for Buddhist monastic women. Thus, this study of the Buddhist discourse of birth is also a genealogy of gender in middle period Indian Buddhism. Offering a new critical perspective on the issues of gender, bodies and suffering, this book will be of interest to an interdisciplinary audience, including researchers in the field of Buddhism, South Asian history and religion, gender and religion, theory and method in the study of religion, and Buddhist medicine.

Arranged according to the meaning of words, the work contains more than 1,000 groupings of synonyms from the principal Indo-European languages. Buck first tabulates the words describing a particular concept and then discusses their etymological and semantic history, tracing changes in meaning of the root words as well as presenting cases indicating which of the older forms have been replaced by expressions of colloquial or foreign origin. The Aramaic papyri found on the island of Elephantine, Egypt (ancient Yeb, opposite Syene) come from the fifth century BC. They include letters, personal archives, public archives, the 'Words of Ahikar,' the Behistun inscription, accounts, and lists. Cowley provides here the Aramaic transcriptions and English translations for all the texts available to him. In this edition, an updated bibliography is provided. Most studies of Buddhist communities tend to be limited to villages, individual temple communities, or a single national community. Buddhist monastics, however, cross a number of these different framings: They are part of local communities, are governed through national legal frameworks, and participate in both national and transnational Buddhist networks. Educating Monks makes visible the ways Buddhist communities are shaped by all of the above—collectively and often simultaneously. Educating Monks examines a minority Buddhist community in Sipsongpannā, a region located on China's southwest border with Myanmar and Laos. Its people, the Dai-lue, are "double minorities": They are recognized by the Chinese state as part of a minority group, and they practice Theravāda Buddhism, a minority form within China, where Mahāyāna Buddhism is the norm. Theravāda has long been the primary training ground for Dai-lue men, and since the return of Buddhism to the area in the years following Mao Zedong's death, the Dai-lue have put many of their resources into providing monastic education for their sons. However, the author's analysis of institutional organization within Sipsongpannā, the governance of religion there, and the movements of monks (revealing the "ethnoscapes" that the monks of Sipsongpannā participate in) points to educational contexts that depend not just on local villagers, but also resources from the local (Communist) government and aid from Chinese Mahāyāna monks and Theravāda monks from Thailand and Myanmar. While the Dai-lue monks draw on these various resources for the development of the sangha, they do not share the same agenda and must continually engage in a careful political dance between villagers who want to revive traditional forms of Buddhism, a Chinese state that is at best indifferent to the continuation of Buddhism, and transnational monks that want to import their own modern forms of Buddhism into the region. Based on ethnographic fieldwork and interviews with Dai-lue monks in China, Thailand, and Singapore, this ambitious and sophisticated study will find a ready audience among students and scholars of the anthropology of Buddhism, and religion, education, and transnationalism in Southeast and East Asia.
