**Teaching Today's Mathematics in the Middle Grades** Feb 25 2023 "Teaching Today's Mathematics in the Middle Grades" provides current and future middle school teachers with the mathematics content, essential concepts, methodology, activities, and resources to both learn and teach mathematics in grades 5 to 8. The authors focus exclusively on the middle school learner and the middle school mathematics curriculum. Although each chapter discusses foundational mathematics concepts from earlier grades and previews topics that will follow the middle grades, the emphasis is on the middle school. This selective focus allows for proper development of critical topics in the middle school such as proportionality algebraic thinking, and the integral role of manipulatives. Assessment practices and problem solving are also emphasized from the viewpoint of effective practices for middle school students. Unique Features React and Reflect features prompt classroom discussions by asking the reader to think independently regarding a statement, issue, or concern. Try This features ask the reader to solve a problem first, or extend the current discussion by working on an extension of a problem. By completing the problem first, teachers are putting themselves in the place of their students, helping the teacher discover first-hand common misconceptions. Numerous exercises and activities appear at the end of each chapter to reinforce student understanding of various topics and ensure mastery of the mathematics content. The NCTM Principles and Standards are emphasized throughout the book, beginning with a discussion in Chapter 1. Each of the content chapters (6-11) opens with the relevant NCTM content standards for that chapter. In addition, marginal icons highlight areas within the text in which the NCTM process standards are discussed. Reviewers rave. . . "From the content, organization, and approach, it is evident that the authors have years of teaching experience. This gives the text authority." --"Marina Krause, California State University-Long Beach" "The authors do an excellent job of presenting in sequential order essential concepts, methodology, activities, and technological resources essential to assist [the] beginning math teacher in preparing to teach in the middle school program." --"Gerald Jarmon, North Carolina Central University"

**Stuck in the Middle** Jan 12 2022 Donna Hooker Topping and Roberta McManus help you support struggling middle school students with page after page of immediately useful, ready-for-differentiation teaching. These strategies work by making the process of content-area literacy transparent and repeatable. Without interrupting the flow of instruction, these strategies help adolescents: not only read texts but understand them too; make crucial subject-area vocabulary stick; grapple with themes, ideas, and content through writing; find ways into content that fit individual learning styles. --Publisher's description.

*In the Middle of the Middle West* May 04 2021 The 42 essays in this collection take their inspiration from the Midwest--not just from its physical terrain but from its emotional terrain as well. They come from writers of diverse backgrounds: poets, novelists, filmmakers, and journalists; some who came and stayed, some who came and left, and some who were born and raised in this place. The essays revolve generally around issues of conflict between place and identity, and the theme of diversity--be it religious, sexual, racial, artistic, cultural, occupational, or geographical--runs throughout. Writers featured in this collection include Maxine Chernoff, Stuart Dybek, Michael Martone, Cris Mazza, James McManus, Scott Russell Sanders, Mary Swander, and many others of national reputation.

[Teaching in the Middle School](#) Sep 08 2021 The exceptional feature of this book is that it covers both middle school concepts and the basic information needed to understand young adolescents, ages 10-14. It provides the essential knowledge for middle school teaching including young adolescent development, organization, core and exploratory curricula, instructional strategies, and concepts. Distinguished by its skillful blending of research and practice, it enables readers to move from theory to practice. Chapter coverage explores how middle school educators provide culturally and gender responsive educational experiences for particular topics. Discussion of the latest technology gives today's teachers access to the vast world of information and helps them take advantage of the rapidly changing technological advances. Anecdotal accounts, case studies, and scenarios provide actual accounts of experiences with young adolescents and how middle school teachers have handled these situations and issues. For general education teachers at the middle school level.

**The Middle** Apr 27 2023 On 1 January 1999, Travis Gale (aged 17) and Stephen Bonaconsa (aged 27) left Johannesburg on a mission to cycle across four continents and raise R1 million for children living with, and affected by HIV/AIDS in KwaZulu-Natal. They pedalled out of Johannesburg, riding mountain bikes equipped with panniers, carrying the basic requirements for an adventure. They rode unsupported. No Instagram or Facebook. It was just the two of them and the open road. The pair successfully cycled over 16 000 kilometres, across four continents, through 16 countries, raising R1.7 million for their cause. When asked to share about his experience, Travis very rarely spends time talking about the start or the finish of the tour. The stories Travis shares are from *The Middle*. It's *The Middle* that tests us with challenges, yielding a multitude of emotions. It's *The Middle* that involves the raw and often painful need to dig deep, to push through the barriers that stand in our way, and show ourselves what we are capable of. *The Middle* is what we, as human beings, were designed for. We can all pitch up at start lines. We can all celebrate a finish. But no finish is without a Middle and every Middle is where WHO WE ARE is revealed. This book, *The Middle*, includes eight stories, drawn from eight key days of a world cycle tour, which will encourage and equip people through *The Middle*, the territory we must navigate in pursuit of our goals. Keep going. Increase momentum towards meaningful goals. Develop grit and resilience in the midst of tough terrain. Push through barriers that consistently get in the way. Learn practical frameworks for making things happen. Stretch yourself to do more than you thought possible. Finish well!
