This volume brings together exciting new field data by more than two dozen Andean scholars who came together to honor their friend, colleague, and mentor. These new studies cover the enormous temporal span of Moseley's own work from the Preceramic era to the Tiwanaku and Moche states to the Inka empire. And, like Moseley's own studies -- from Maritime Foundations of Andean Civilization to Chan Chan: The Desert City to Cerro Baul's brewery -- these new studies involve settlements from all over the Andes -- from the far northern highlands to the far southern coast. An invaluable addition to any Andeanist's library, the papers in this book demonstrate the enormous breadth and influence of Moseley's work and the vibrant range of exciting new work by his former students and collaborators in fieldwork. Florida served as one of the great meeting grounds of the planet, a place where peoples from Indian America, Latin America, Africa, the Caribbean and Europe converged. This book features essays in both Spanish and English on the influence of the Spanish in Florida from the first explorers to the latest Hispanic migrations into Miami.
