Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub. This book presents the proceedings of the 24th European Conference on Artificial Intelligence (ECAI 2020), held in Santiago de Compostela, Spain, from 29 August to 8 September 2020. The conference was postponed from June, and much of it conducted online due to the COVID-19 restrictions. The conference is one of the principal occasions for researchers and practitioners of AI to meet and discuss the latest trends and challenges in all fields of AI and to demonstrate innovative applications and uses of advanced AI technology. The book also includes the proceedings of the 10th Conference on Prestigious Applications of Artificial Intelligence (PAIS 2020) held at the same time. A record number of more than 1,700 submissions was received for ECAI 2020, of which 1,443 were reviewed. Of these, 361 full-papers and 36 highlight papers were accepted (an acceptance rate of 25% for full-papers and 45% for highlight papers). The book is divided into three sections: ECAI full papers; ECAI highlight papers; and PAIS papers. The topics of these papers cover all aspects of AI, including Agent-based and Multi-agent Systems; Computational Intelligence; Constraints and Satisfiability; Games and Virtual Environments; Heuristic Search; Human Aspects in AI; Information Retrieval and Filtering; Knowledge Representation and Reasoning; Machine Learning; Multidisciplinary Topics and Applications; Natural Language Processing; Planning and Scheduling; Robotics; Safe, Explainable, and Trustworthy AI; Semantic Technologies; Uncertainty in AI; and Vision. The book will be of interest to all those whose work involves the use of AI technology. Cut out and quilt away! These 1" hexagons aren't going to make themselves. I'm incredibly excited to introduce this book of templates for my fellow crafters. No more template drawing with a ruler, no more varying sizes, no more blurry printables with wavy lines, my friends! Here's a book of over 1000 hexagons with 1" side. Designed to work with your roller cutter as well as regular scissors - whatever works for you! Every hexagon has two sides - one blank side for your notes (fabric notes for example?) and one printed side with quilting quotes to keep you smiling all day long. Blanket planning charts The book includes 12 charts for you to plan the perfect blanket, including the number of hexagons you'll need as well as the number of columns/rows for each individual quilt size. I included 6 most common duvet cover sizes with 2 copies of each chart. Color them in and plan where every scrap will go! Regular white paper This book is printed on regular white paper, so you can either glue the fabric to the template or sew right through the paper. Whatever works best for you! Perfect gift for a quilting addict If you know someone who loves English paper piecing or has a new found love for this technique, the book will make the perfect gift for any occasion. The best gifts are really the ones we can craft with, trust me on this one. Suitable for various sizes From small appliques to large blankets - you decide how many hexagons you'll use! You can always cut out a few pages of templates and leave the rest in the book for your future quilting projects. No more loose hexagon cards all over the craft room!
